

GOLDEN EAGLE

Thermal Fog Applications

CURTIS DYNA-FOG[®]
from **B&G**

FEATURES & BENEFITS

VERSATILE

- Lightweight aluminum construction for handheld operation
- Easily dispenses oil base products effectively, and economically
- Electric starting system allows quick application of product in both small as well as larger applications.
- Factories, campgrounds, warehouses, parks, barns, recreation areas, food processing, and greenhouses are just a few of the users of the Golden Eagle

POWER

- Starting -12 VDC, internal removable 8 D cell alkaline batteries, or included automotive cigarette lighter adaptor/outlet cable
- Once started, the 30 HP gasoline fueled pulse jet engine powers the formulation and fogging system entirely

THERMAL FOG

- Allows better penetration into dense foliage and outstanding coverage into remote spaces that cold fogging may not reach
- Metering valve to adjust product flow rate is adjustable from 0-19 oz/minute (0-560 ml/minute)
- Particle size of 0.5 to 50 microns
- Easily directed output can utilize wind drift and air currents or draft to assist in carrying the fog further to desired target areas

TANKS

- Corrosion-resistant, stainless steel
- Formulation tank: 1.1 gallons (4.2 liters)
Fuel tank: 1.2 quarts (1 liter)

INDUSTRIES

Pest control.
Recreation.
Odor control.
Fungicides.

COMPATIBILITY

Oil or Carrier based thermal formulations.
